

City of Kinston
Code: E14-T
Medium General Service Time of Use

Availability

This Schedule is available as an option for nonresidential service when the Customer's maximum metered demand in two consecutive months is over 30 kW but less than 1,000 kW. Service will be supplied at one point of delivery through one meter provided by the City to record use for monthly billing.

This Schedule is not available for residential or resale service or for breakdown, standby, or supplementary service without prior written approval of the City. Service will be transferred to another applicable schedule if metered demand is below 30 kW for twelve months or above 1,000 kW in two consecutive months.

Generation may not be interconnected to the utility system or operated by the Customer with service provided under this Schedule without prior written approval from the City. The Customer must install equipment acceptable to the City to protect personnel performing maintenance or repairs and prevent damage to electric system facilities prior to receiving approval. The Customer will be responsible for any injury or damage caused by the operation of such generation. The Customer's electric service will be subject to immediate suspension without notice until adequate protection equipment is installed and approval for generation operation is obtained from the City.

Type of Service

Service available is alternating current, 60 hertz, single phase 2 or 3 wires, or three phase 3 or 4 wires, at the City's standard voltages. When the Customer desires two or more types of service, the service will be provided in separate accounts.
