City of Kinston Annual Operations and Performance Report 2012

Kinston Regional Water Reclamation Facility (KRWRF)

| | |
|-----------------|-----------------------|
| NPDES | # NC0024236 |
| Design Capacity | 11.85 Million Gallons |
| Treatment Type | Johannesburg Process |
| Service Date | 2006 |

Facility Comments:

The last annual inspection report for the Kinston Regional Water Reclamation Facility, dated December 15, 2011, was found to be in compliance with its discharge permit. There were no Notices of Violation during calendar year 2012. There was one (1) Notice of Deficiency letter (NOD-20120LV-0072) received concerning the City's spray irrigation fields. It was noted that two effluent concentrations for Fecal Coliform were above the daily maximum effluent limits for the City's spray irrigation permit WQ0029289. These incidents were fully investigated and it was concluded that the plant's UV disinfection system was not properly disinfecting to the levels required for spray irrigation though they met the treatment plant's NPDES discharge limits.

SANITARY SEWER COLLECTION SYSTEM

During calendar year 2012, the collection system reported zero (0) sanitary sewer overflows (SSO's).

Any spill of 1,000 gallons or more and any reaching surface waters are required to be reported to the DWQ.

The last annual inspection report for the collection system dated August 27, 2010. The North Carolina Division of Water Quality did not perform an inspection for the collection system during calendar year 2011 or 2012.

Responsible Person Contact Listing

General:

| | |
|---|--------------|
| Rhonda Barwick - Public Services Director | 252-939-3303 |
